

TMC self-steer axles improve maneuverability and provide smooth steering action.

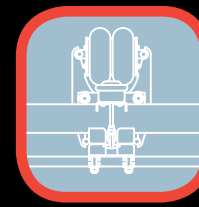

Available mounted to mechanical or airbag suspension, for multi-axle groups and low-ride configurations, the TMC self-steer axle comes as a "modular" package with TMC's easy-to-fit "LMV Series" airbag suspension for lower tare weight and reduced life-cycle cost.

TMC's standard 10-tonne rated self-steer axle can be fitted with either drum or disc brakes and with optional hub wheel fixing types to suit 22.5", 19.5" or 17.5" wheels.

TMC standard self-steer axle incorporates a 12-degree steer angle and is equipped with pneumatic reverse locking device.

Reduces tyre scrub in many trailer applications
