

UB82 UNITIZED BEARING DRUM BRAKE AXLES FOR 17.5" WHEELS

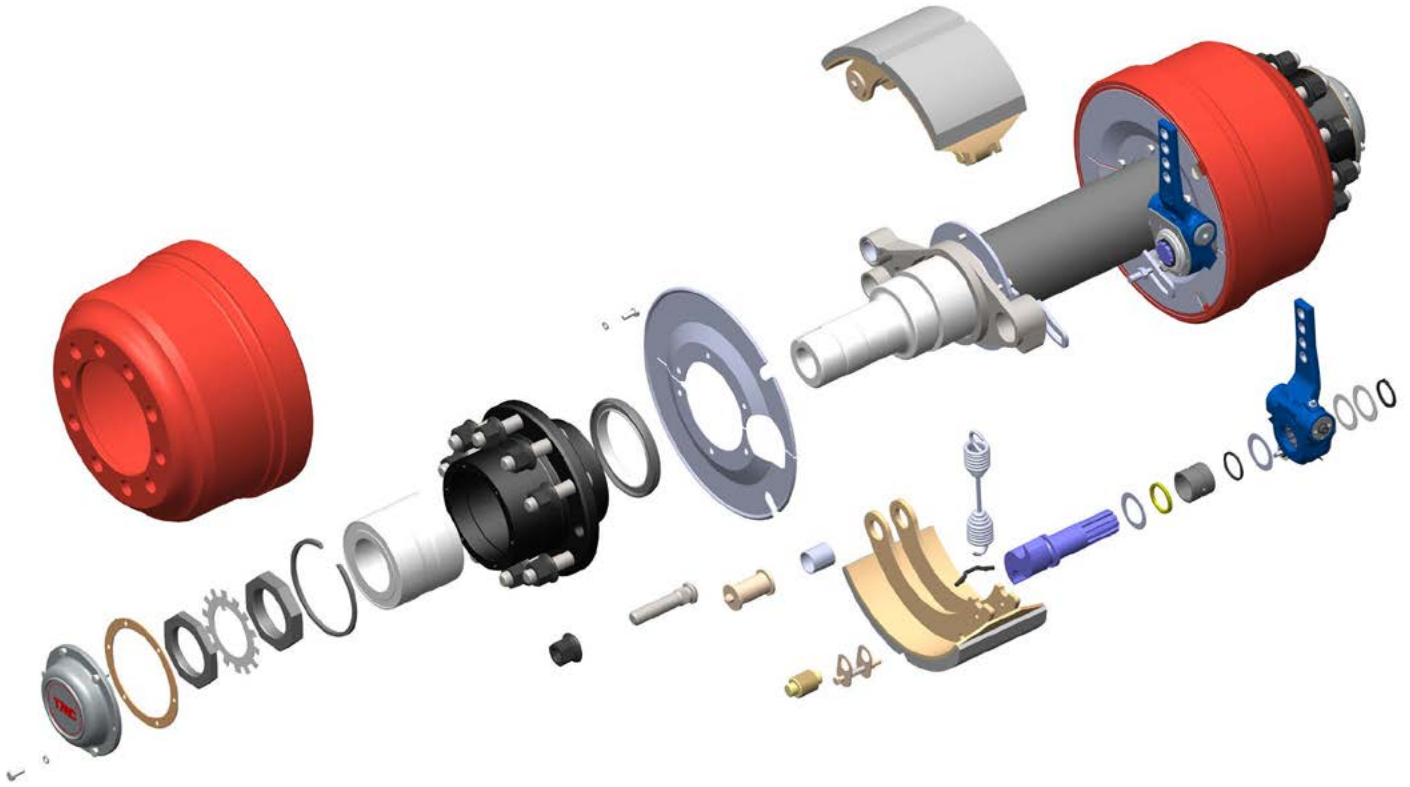

Originally developed in conjunction with Australia's leading specialist low-loader manufacturer for rows-of-eight applications, the UB82 axle for 17.5" wheels can now also be specified with the larger 335mm x 210mm brake (ADR38 rated capacity 11.5 tonne) and at any track length and, in that format, can be fitted to any of TMC's extensive range of airbag or mechanical suspensions.

UB82 allows the operator to eliminate the human factor from seal maintenance and bearing adjustment, thus ensuring substantially lower life cycle costs.
